University of Illinois at Urbana-Champaign
Bachelor of Science in Computer Engineering

December 2020
GPA: 3.84/4.00

Relevant Coursework:

Data Structures	Computer Architecture	Computer Systems & Programming
Digital Signal Processing	Applied Linear Algebra	Probability with Engineering Applications

Work Experiences

Katabat

June 2018 - July 2018

Data Scientist Intern

Wilmington, DE

- Designed machine learning models using LightGBM to predict likelihood of debt payment with over 70% accuracy in team of four
- Analyzed and organized data graphically using packages such as pandas and seaborn
- Maintained server connections between super computers for testing machine learning models efficiently

Projects

FutureList - anime score prediction app

November 2018 - May 2019

- Developed interactive GUI Electron app to predict scores of anime by machine learning model and display graphical analysis of data
- Utilized HTML, CSS, Javascript, Node.js, Python, and Electron to develop

MalLinker - discord bot that links webpage of anime database

October 2018 - April 2019

- Built discord bot for searching anime database and linking webpage with metadata message using Javascript and Node.js modules

mal_score_prediction - proto type of FutureList

August 2018 - January 2019

- Created command-line Python app for predicting scores of anime by machine learning model with XGBoost and Scikit-Learn packages in Python

Technical Skills
